

```
package pp;

public class cheack {
    void con(int a) {
        if (a%2==0)
            System.out.println("even");
        else
            System.out.println("odd");
    }
}
```

+++++

```
package pp;

import java.util.Scanner;

public class program {

    public static void main(String[] args) {
        // TODO Auto-generated method stub
        // cheack m = new cheack();
        //m.con(10);
        Scanner input = new Scanner (System.in);

        int n1=input.nextInt();

        cheack m = new cheack();
        m.con(n1);

    }

}
```
